v2.9.7.3

The screenshot displays a web-based management interface. On the left, a sidebar contains navigation links: '用户管理' (User Management), '报表管理' (Report Management), '报表刷新管理' (Report Refresh Management), '报表评论管理' (Report Comment Management), '用户日志' (User Log), '系统日志' (System Log), '系统设置' (System Settings), '安全设置' (Security Settings), '邮件服务器' (Email Server), '接口插件' (Interface Plugin), and '许可证' (License). The '用户日志' (User Log) option is currently selected.

The main content area shows a table of user activities. A modal window titled '日志详细信息' (Log Detail Information) is open, displaying a detailed log entry. The log entry includes a timestamp, the user 'Administrator', and a detailed description of the operation: 'Refreshing report: 采购模块, Total spent: 271726 ms'. The modal also shows a list of log entries with columns for '姓名' (Name), '行为' (Action), and '时间' (Time).

The background table shows a list of IP addresses, service nodes, and dates. The table has columns for '请求IP' (Request IP), '服务节点' (Service Node), and '日期' (Date). The data rows show various IP addresses and service nodes, with dates ranging from 19小时前 (19 hours ago) to 1天前 (1 day ago).
